

Project plan

The Idea

The plan

The implementation

The Idea

I was assigned by the client (my teacher) to make a website in WordPress that will contain the pages from previous assignment and a main page with blog post

The plan

Deadline : June 13

the type of website would be a WordPress website, that mean we will use the WordPress tools to make the pages and blogs.

site structure

- The site will contain one main page, hat have only blog post
- A web page about history and integrity.
- A web page about me
- A web page for contact me with a form
- And a web page that thank the user for writing in the form

The implementation

The implementation of the whole website willbe done in WordPress and with help of the tools to add pages and blog post the site will be be build.

For the style it will be be implemented manually in style.css file
